

## Customer Privacy and Security Statement

DecriPt Inc. ("DECRIPT") has developed policies and procedures to ensure the protection of customer protected data provided to DECRYPT (the "Protected Data") during the provision of services by DECRYPT related to the DECRYPT Software Products and Services.

**Maintenance Services:** DECRYPT has acceptable levels of encryption and passwords to protect email and its own internal systems.

**Consulting Services:** In cases where DECRYPT is exposed to customer Protected Data while performing consulting services related to the DECRYPT software and services, such DECRYPT personnel are not authorized to disclose Protected Data to third parties or retain Protected Data beyond the term of the agreement.

Remote access by DECRYPT personnel to networks or systems of customers who maintain, process or utilize active Protected Data in connection with their implementation of DECRYPT Software is strictly prohibited unless the customer can guarantee such access will not include inadvertent exposure or the introduction of customer Protected Data into DECRYPT's networks or systems.

All DECRYPT personnel are required to maintain the confidentiality of any Protected Data and are prohibited from using it for any purpose other than to provide the Decript services. Customer Protected Data is treated in as protective or restrictive a manner as DECRYPT's own most sensitive and trade secret information and data. Except as described in this statement, DECRYPT will not disclose the Protected Data outside of DECRYPT and its controlled subsidiaries and affiliates. DECRYPT may occasionally hire other third party companies to provide limited services on our behalf. Those companies will be permitted to obtain only that information which they need to deliver the service. Further, they are required to maintain the confidentiality of the information and are prohibited from using it for any other purpose.

**Data Collection:** By visiting the DECRYPT web site, you have provided us with certain information. DECRYPT does collect information about customers including the type of browser and operating system you use, the date and time you visited the site, the web pages or services you accessed for analytical and statistical purposes to help better manage the site. Software programs allow DECRYPT to compile this information and determine the most interesting parts of the web site, the most effective services, and any problem areas.

**Disclosure to Third Parties:** DECRYPT will not rent, sell, or distribute any personally identifiable information entered into the website (name, address, phone number, etc...) or electronic mail address to any third party for marketing or mailing list purposes. Your credit card information will not be disclosed for any reason except those related to your transaction or as required by law.

DECRIPT will not rent, sell, or distribute customer data to any third party except as provided for herein or as otherwise agreed upon between parties.

DECRYPT utilizes some of the most advanced technology for Internet security available today. When you access our site using Netscape Navigator 6.0 or Microsoft Internet Explorer versions 5.5 or higher, Secure Socket Layer (SSL) technology protects your information using both server authentication and data encryption, ensuring that your data is safe, secure, and available only to registered Users in your organization. Your data will be completely inaccessible to your competitors.

DECRYPT provides each User in your organization with a unique user name and password that must be entered each time a User logs on. DECRYPT issues a session "cookie" only to record encrypted authentication information for the duration of a specific session. The session "cookie" does not include either the username or password of the user. DECRYPT does not use "cookies" to store other confidential user and session information, but instead implements more advanced security methods based on dynamic data and encoded session IDs.

In addition, DECRYPT is hosted in a secure server environment that uses a firewall and other advanced technology to prevent interference or access from outside intruders.

This statement is effective March 20, 2009 and remains in effect until amended. Decript, Inc. reserves the right to amend this Customer Privacy and Security Statement or alter its privacy principles at its sole discretion without notice to you. Any alterations to this Customer Privacy and Security Statement or our privacy principles will be posted on our web site in a timely manner.

DECRYPT welcomes your comments regarding this privacy statement. If you have questions about this statement or believe that we have not adhered to it, please contact us at the following address:
